REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 – 17 and 22 – 35,

Blevins reference (U.S. Patent No. 6,445,963) teaches,

- Implementing multiple-input/multiple-output control such as model predictive control.
[Abstract]
- A data collection routine collects data indicating the response of each of the process outputs to the process inputs. [Abstract]
- A screen display enable an operator to implement the different steps of generating an advanced control block. [Col. 14, Lines 15 – 52]

Bartusiak reference (U.S. Patent No. 5,682,309) teaches,

- A system controls a plant process which includes manipulated variables and control variables. [Abstract]
- Plant data include current values for the control variables, manipulated variables and auxiliary or feed forward variables. [Col. 4, Lines 50 – 60]

The combination of Blevins reference and Bartusiak reference fail to teach,

- a process control configuration system for use in creating or viewing a control block having an integrated optimizer; and
- there is no motivation for combining Bartusiak reference with Blevins reference.

Art Unit: 2121

Regarding claims 18 – 21,

Wojznis reference (U.S. Pub. No. 2004/0049299) teaches,

- enabling at least one of the auxiliary variable limits to be violated.

The combination of Blevins reference and Wojznis reference fail to teach,

- enabling at least one of the set point limits to be violated.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
